FOR IMMEDIATE RELEASE:

SECURE FIREARM PRODUCTS WALL VAULTS ARE AN AFFORDABLE, SECURE, AND SPACE-SAVING ALTERNATIVE TO AN EXPENSIVE, LARGE, HEAVY SAFE. KEEPS HANDGUNS SAFELY LOCKED AWAY BUT AT ARM'S REACH IN AN EMERGENCY IN UPSTAIRS BEDROOMS. PERFECT FOR RESTAURANTS AND BUSINESSES FOR IMPORTANT KEYS AND VALUABLES.

May 1, 2004 – Secure Firearm Products' wall vaults are constructed of heavy gauge steel with an all-internal locking system and a Medeco® High Security Lock, which makes these safes difficult to enter by force. The Medeco® cylinder is a unique design that provides a high degree of security which offers superior pick resistance, excellent resistance against drilling and other forced attacks, and also provides protection against unauthorized key duplication.

Secure Firearm Products wall vaults are available in two sizes for mounting in a 2" x 4" or 2" x 6" and larger stud wall on 16" centers. The vault's face extends only 1/8" from the wall. Thus, the low mount style saves space and can be concealed behind a mirror, picture or even clothes hanging in a closet. There are several models to choose from, with sizes ranging from handgun to rifle. All vaults include adjustable shelving for convenience, and a durable textured powder-coat paint in off white. We include tips for extra security concealment with every purchase.

See the wall vaults along with other innovative products from Secure Firearm Products at the NRA Bianchi Cup, the NRA National Matches in Camp Perry, OH, and the 2004 SHOT Show.
