

PRESS RELEASE

FOR IMMEDIATE RELEASE

Secure Firearm Products introduces its improved line of security cases

CARL JUNCTION, Mo. - Secure Firearm Products (SFP), which makes some of the world's finest shotgun, handgun, tactical and rifle security cases, offers a new easy-to-use, push button locking system. This improved locking system makes SFP cases the most secure to hit the market since the introduction of their original internal locking firearms case.

SFP cases are used and endorsed by professional shooters such as Todd Jarrett as well as gun manufacturers who use SFP cases to transport and protect the firearms they take to shows.

Handgun Cases

The locking system uses a push button locking system along with their exclusive internal locking system and a Medeco high security lock instead of the removable cylinder, making it more secure and easier to use. Plus, the handgun case has been streamlined to fit inside your checked luggage and has a cable side locking system that works in conjunction with the internal locking system so you don't have to check it separately. Not only does this help prevent theft, travelers also will avoid additional baggage fees*. (* Note: Airlines may have their own additional requirements on the carriage of firearms and the amount of ammunition that you may have in your checked baggage. Therefore, travelers should also contact the airline regarding its firearm and ammunition carriage policies.)

In addition, side locking handgun cases now can be secured or unsecured from the cable or docking system without opening the case*, which is perfect for mounting underneath vehicle seats. (*case does have to be unlocked)

Tactical Cases

This heavy duty case was designed for military, law enforcement and Homeland Security personnel, hunters and target shooters who want a case they can secure to a vehicle yet easily remove it when needed. Multiple docking stations are available enabling cases to be mounted vertically or horizontally.

The tactical cases include a separate internal locking system that allows the case to be securely locked to the docking station. Options available include keying locks alike and/or a removable core lock for key control systems.

Security Case Construction Features:

- A variety of sizes
- Heavy gauge aluminum for strength without weight, rust-proof
- High quality hardware and welded corners for security and durability
- Medium density foam interior to secure firearm from movement
- Comfortable rubber grip handles
- Heavy duty, plated-steel latches provide reliable closure for carrying, even when case is not locked
- Steel bail handle swings 180 degrees
- High density urethane gasket protects from dust and moisture
- 16 gauge piano hinge
- Made in the USA (with some of the hardware made in England)

About Secure Firearm Products

Secure Firearm Products is a family owned and operated business. The Surgi family has been in the manufacturing business for over 60 years, and has developed and manufactured a high quality line of products for shooting sports enthusiasts and professionals since 2001. Their product line includes high security firearms cases, wall vaults and shooting target systems.
