SPRING TENSION TESTER and FIRING PIN TOOL TO BE SHOWN AT SHOT SHOW

Carl Junction, MO---(January 3, 2013)

Secure Firearm Products (SFP) will unveil to shooters, the shooting Press, dealers and distributors, two very much needed products/packages to the shooting industry at the upcoming Shot Show in January 15-18, 2013 (Booth # 1008).

Spring Tension Tester:

The Spring Tension Tester (STT) is a much needed tool for anyone from the avid shooter, home gunsmith, or pro gunsmith that will enable their easy-to-use universal device to check the tension/poundage strength of most springs, and in almost all firearms. The STT incorporates a digital scale to measure the tension of coil mainsprings; firing springs; striker springs or any coil springs for semi-auto pistols, revolvers, rifles and shotguns.

Instantly determine the strength of your firearm springs. If its weak or defective, you'll know that it needs replacing. In addition, with the STT you'll be able to test all springs in your inventory, and better organize/label all those loose springs on your gun work bench.

Firing Pin Tool:

Easy and simple to use, the Firing Pin Tool allows shooters to quickly remove the firing pin stop from 1911 type firearms and their clones. It also allows the easy insertion of the firing pin stop, by holding the firing pin stop and pushing down the firing pin.

2013 Marketing:

Come and see our demonstration of the Spring Tension Tester tool, and the Firing Pin Tool at the Shot Show (Booth #1008). Secure Firearm Products is offering a new Countertop Point of Sale Display (POS) that will include 5 Spring Testers, and 10 Firing Pin Tools. All are packaged individually, in a sealed plastic clam shell. Free shipping to anywhere in the U.S., for all orders placed at the Shot Show.

Drop off your business card to Booth #1008, to win a Spring Tension Tester and Firing Pin Tool. A winner will be drawn daily!

#30
